AWARD MESSAGE

Thank you Nhan for your great work in Linx to OCM data migration project. You showed your strong technical skills in Java, Spring Boot and shell scripting, etc. You learned about the Linx application and OCM platform quickly. Even though the project required a lot of attention to the details and tedious work, you showed your patience and carefully took care of the technical details. Your development work on the Linx producer side is essential to the success of data extraction from Linx to FHIR format. You also picked up the work on the consumer side and helped a lot with fixing issues. I especially appreciate that you spent a lot of hours outside of regular work time to run the data extraction in stage and production. I am very glad to have you in this project and enjoyed working with you.
